Tuning Fork – 22N02

Advin Health Care manufacturer Advin Tuning Fork with international quality Standard. Tuning forks are an often-opted method of testing for certain types of hearing loss.

A doctor first holds a humming tuning fork to your skull and, using a stopwatch, monitors how long you can hear it. The doctor then strikes the tuning fork again and monitors how long you can hear it when it's held next to your ear. This is a set of three tuning forks with three different electromagnetic waves.

Advanced Features:

- 🔊 A tuning fork is a metal instrument with a handle and two prongs or tines
- 🔊 Tuning forks, will vibrate at a set frequency to produce a musical tone when struck
- 🔊 The forks are made of stainless-steel material.
- 🔊 They are resistant to corrosion and abrasion
- 🔊 It can be used for a long time
- 🔊 They produce sound waves of 128 Hz, 256 Hz and 512 Hz respectively
